

SIPHIWESIHLE JOY GWALA

065-860-3939 • siphiewesihlejguala@gmail.com

SUMMARY

Final-year Diploma in Computer Science student at Tshwane University of Technology, with a strong foundation in software development, database systems, and system design. Experienced in Java, Android development, and PL/SQL, with a focus on building practical, user-focused solutions. Demonstrates strong problem-solving ability, attention to detail, and adaptability in technical environments.

EDUCATION

Tshwane University of Technology

Jan 2022-Present-

Diploma In Computer Science

- Specialization in Java , Basic Computer Logic, PL/SQL Querying, Basic Operating Systems

Ekhuruleni East College

March 2021 - August 2021

N2 Diesel Mechanics Focus

- Focus in diesel operations in automotive and machinery systems

Rhodesfield Technical High School

Jan 2020 - Dec 2020

Matric

- N1 Automotive Mechanical Engineering
-

DETAILS

Personal Info:

- Nationality: South African Birth
 - Date: 2003/02/25
 - Age:23
 - Criminal Offences: None
 - Languages: English, IsiZulu, Afrikaans, Sesotho
 - Cell : 0658603939
 - Email : siphiewesihlejguala@gmail.com
 - LinkedIn: <https://www.linkedin.com/in/siphiewesihle-joy-gwala-919321146/>
-

ADDITIONAL INFORMATION

Technical Skills:

- Basic web development
- Operating system fundamentals
- Problem solving using Discrete Structures
- PL/SQL Querying
- Android Development
- Spring Boot
- REST APIs (if applicable)
- Object-Oriented Programming (OOP)
- Debugging & Troubleshooting

Programming Languages:

- Java
- PL/SQL
- Kotlin
- Linux
- HTML/CSS

Soft Skills:

- Good communication skills and presentation abilities
- Team collaboration
- Time management and goal setting
- Adaptability and quick learning

Awards:

- Best Learner Certificate in North District – Technical Science 2020
 - Best Learner Certificate – Automotive Mechanical Engineering 2020
-

PROJECTS

Learner Transport Safety & Tracking System

- Designed and developed a transport management system to improve learner safety and accountability
- Implemented QR/code-based check-in and check-out system for students-
- Enforced vehicle capacity limits and compliance checks
- Designed system architecture using block diagrams and use case modeling- Integrated backend using Spring Boot and mobile frontend concepts (Android/Kotlin)- Focused on real-time tracking and driver accountability

Mobile Application Development (Android)

- Built Android applications using Android Studio and Kotlin
- Implemented UI using Jetpack Compose-
- Applied state management and recomposition principles-
- Handled user interactions (buttons, input, navigation)
- Worked with event-driven programming concepts

Java Web Application Development

- Developed web-based applications using Java
- Implemented form handling and user input validation (e.g., passwords)
- Created reusable methods (e.g., palindrome checker logic)
- Applied basic backend logic and MVC concepts

PL/SQL Database Development

- Developed database-driven solutions using PL/SQL
- Implemented stored procedures and functions for business logic (e.g., employee statistics and reports)
- Performed data analysis using queries (MIN, MAX, AVG, COUNT)
- Applied control structures (loops, cursors, conditional statements) for efficient data processing
- Created structured reports and automated database operations

System Analysis & Design

- Created Use Case Diagrams, BPM diagrams, and System Block Diagrams
- Translated business requirements into technical system designs
- Participated in software development lifecycle (SDLC) phases
- Designed scalable and structured system solutions
